MIX, MATCH AND WEAR

– HOW TO DRESS TO MAKE THE MOST OF YOUR WINTER!

Enjoying the winter is often just a matter of dressing up. The Lynx clothing lineup offers a wide range of options for wearing comfortable layers. Make sure that you stay comfortable and that you are dressed for the conditions and the temperature – both on the snowmobile and in other winter activities. The new Lynx under and mid layer products are marked with the Tec Layer logo.

Tec  Layer

1 Wearing properly layered clothing starts with a high-quality base layer.

A base layer of merino wool or technical fibers wicks moisture to the outer layers and keeps the skin dry, ensuring that you stay warm.

2 The mid layer helps to regulate the body temperature. You can add or take off mid layers depending on the weather and your activity level. For example, the Lynx Hybrid jacket and shorts are designed for active riding in freezing weather. The Primaloft insulation used in the Hybrid products keeps you warm, while a set of strategically placed stretch channels ensures that moisture is actively wicked out through the outer layer. Lynx clothing lineup offers three new insulation jacket options and other mid layer products that make sure that your riding experience is enjoyable in all conditions.

3 Choose the outermost layer based on the temperature, the length of the trip and your riding style. You can choose from a wide range of one- and two-piece suits. The high-quality materials of Lynx clothing range's outermost layer protect you from the wind and water, while also taking care of breathability and temperature regulation. We use Sympatex and RPM Max membranes in the outermost layer. They have been selected and tested with care to meet the needs of demanding riders and other winter sports enthusiasts. The season's new outer layer items include one-piece suits for men, women and children in the Lynx Squadron lineup.

HOW TO MEASURE

HEIGHT: without shoes, standing with heels and back against a wall.

HEAD: around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

ARM LENGTH: let the hands hang down on the side in a slightly bent position. Measure from the center of the back of your neck, along the length of your arm, to the wrist.

CHEST: measure under your arm, around the fullest part of your chest.

WAIST: immediately below the lowest rib.

HIPS: across the fullest part of the seat.

INSEAM: without shoes, from crotch to the floor.

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.
